

Car Detailing Products

Finish Renu Car Care Products is a division of Renu cleaners LLC. Finish Renu Car Care was created for the automotive industry with the intension of providing professional quality customer service and exceptional products to our customers. Stemming from our vast experience in the industry for 23 years and using, selling and manufacturing some of the larger well know names in the industry, we have decided to use their strengths and grow from their oversights.

Car Detailing Products

Renu Cleaners LLC is based in Corona, California with a secondary distribution warehouse in San Jose, Ca. We are a manufacturing and supply company for the automotive aftermarket industry. We pride ourselves in providing premium quality automotive products and accessories. We offer over 23 years of experience with product research and development as well as an advanced background in automotive reconditioning, sales and customer service.

As our growth continues to move forward into the automotive reconditioning after market, our resources will be devoted to ensure we are the most service orientated and innovative company in the industry. We will continue to develop new products for the ever changing automobiles as well as our vigilance to maintaining our ever changing environment.

Our staff at Finish Renu Car Care Products are well trained and dedicated to provide effective product knowledge and customer support. We offer various types of programs for those interested in distributorship opportunities worldwide as well as our private label program.

Fabric Sealant - 32oz

Fabric Sealant has been formulated to protect carpet and upholstery fabrics from staining due to spills of beverages, foods, and heavy foot traffic. Fabric Sealant is comprised of specialty polymers and solvents and is VOC compliant.

Paint Sealant - 32oz

Paint Sealant is the ideal protective coating for your vehicles finish. Made from Nano polymers and select carnauba wax. The result is a brilliant polished surface, color depth and lasting protection against environmental contaminants such as acid rain, industrial fallout, oxidation, tree sap, and bird droppings.
